SUMMARY

Information Science Engineering undergraduate (CGPA 9.40, 2027) with hands-on experience building full-stack web applications using React, TypeScript, Node.js, and Supabase. Shipped projects spanning real-time analytics, developer tooling with Docker and CI/CD, and role-based campus management systems. Solved 230+ LeetCode problems (rating 1470) across arrays, graphs, trees, dynamic programming, and binary search. Strong fundamentals in Data Structures, Algorithms, OOP, OS, and DBMS.

SKILLS

Languages: C, C++, JavaScript, TypeScript, SQL

Frontend: React, HTML, CSS, Figma

Backend: Node.js, Express.js, Next.js, REST APIs, Supabase, JWT Auth, Server-Sent Events (SSE)

Databases: MongoDB (Atlas, Mongoose), SQL

Tools & DevOps: Git, GitHub, Docker, Jenkins, CI/CD

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, OOP

PROJECTS

Decode2Deploy – Developer-Investigation ARG Platform 🌐 [Live](#) 🐙 [Code](#) *Next.js, React, MongoDB, JWT*

- Built a full-stack ARG platform (Next.js 16 App Router, MongoDB Atlas) handling team auth, puzzle progression, and clue validation for a live event with 200+ participants.
- Designed an anti-cheat architecture: clue answers never reach the frontend, all validation runs server-side, and sessions use JWTs in HttpOnly cookies to close off client-side tampering.
- Built custom rate limiting and activity logging (IP, timestamp, correctness) that auto-flags teams making 10+ wrong attempts within 5 minutes.
- Built an admin dashboard for live leaderboard tracking, team progress monitoring, and manual clue unlocks during the event.

Campify – Campus Management Platform 🐙 [Code](#)

React, TypeScript, Supabase, CSS

- Built a multi-module platform covering events, venue booking, marketplace, feedback, and profiles, designed for 50-100 campus users.
- Implemented role-based access control with Supabase Auth across 3 user roles (students, faculty, clubs).
- Shipped a responsive dark-mode UI with image uploads, tested across 3-5 device sizes for consistent UX.
- Built a lightweight analytics dashboard surfacing platform activity insights.

BuildBack – Time-Travel Debugger for GitHub Repos 🐙 [Code](#)

Node.js, Express, Docker, SSE

- Built a tool to clone GitHub repos and run Docker builds against historical commits, enabling point-in-time debugging.
- Implemented real-time build-log streaming with Server-Sent Events (SSE) for instant deployment feedback.
- Designed and developed 9 REST APIs covering repo cloning, commit tracking, build execution, and Jenkins CI integration.

LEADERSHIP

Core Team Member, Coding Club, BMS Institute of Technology and Management

2025 – Present

- Co-organizing a national-level hackathon (Sept 2026) as one of the event heads, driving registrations and marketing via Unstop.
- Built and deployed the Decode2Deploy qualifier round (see Projects) as part of the club's event team.

EDUCATION

BMS Institute of Technology and Management, Bengaluru, India

2023 – 2027

Bachelor of Engineering in Information Science and Engineering

CGPA: 9.40 / 10

Presidency PU College, Bengaluru, India

2023

Class XII (PU)

92%

ACHIEVEMENTS

- **230+ LeetCode Problems Solved**, Rating 1470 – arrays, graphs, trees, dynamic programming, and binary search.
- **1st Place, Riddlex Coding Contest**, BMSIT – college-wide competitive programming contest.
- **8th Place, IEEE Summer of Code** – national open-source contribution program.
- **3rd Place, Advert 2.0**, BMSIT E-Cell – inter-college marketing/strategy competition.
