SUMMARY

Information Science Engineering undergraduate (CGPA 9.36, 2027) building full-stack applications with React, TypeScript, Node.js, PostgreSQL, and real-time systems. Interested in software engineering, backend development, and AI-powered applications.

SKILLS

Languages: C, C++, JavaScript, TypeScript, SQL

Frontend: React, React Router, HTML, CSS

Backend: Node.js, Bun, Express.js, REST APIs, WebSockets, Server-Sent Events (SSE)

Databases: PostgreSQL, Prisma ORM, MongoDB, Supabase

AI & Authentication: Deepgram Voice Agent, Groq, Google OAuth, Server-Side Sessions, HttpOnly Cookies

Tools: Git, GitHub, Docker, Jenkins, Turborepo

PROJECTS

Screenly – AI Technical Interview Platform [Code](#) *React, TypeScript, Express, Bun, PostgreSQL, Prisma*

- Developed a full-stack AI technical interview platform with separate company and candidate workflows for onboarding, candidate management, interview creation, and results.
- Architected Google OAuth with server-side sessions, SHA-256 hashed session tokens, HttpOnly cookies, and protected routes for authenticated company and candidate resources.
- Engineered secure interview invitations using cryptographically random tokens, SHA-256 hashing, and 7-day expiration, with company-scoped candidate and interview authorization.
- Integrated real-time voice interviews using WebSockets and Deepgram, persisted conversation transcripts to PostgreSQL, and connected Groq for structured AI evaluation.

Campify – Campus Management Platform [Code](#) *React, TypeScript, Supabase, CSS*

- Created a multi-module campus platform covering events, venue booking, marketplace, feedback, and profiles, designed for 50-100 users.
- Established role-based access control with Supabase Auth across 3 user roles: students, faculty, and clubs.
- Shipped a responsive dark-mode UI with image uploads and cross-device testing across 3-5 device sizes.
- Added a lightweight analytics dashboard to surface platform activity insights.

BuildBack – Time-Travel Debugger for GitHub Repositories [Code](#) *Node.js, Express, Docker, SSE, Jenkins*

- Built a developer tool to clone GitHub repositories and run Docker builds against historical commits for point-in-time debugging.
- Enabled real-time build-log streaming with Server-Sent Events (SSE) for live build and deployment feedback.
- Designed 9 REST APIs covering repository cloning, commit tracking, build execution, and Jenkins CI integration.

LEADERSHIP

Core Team Member, Coding Club, BMS Institute of Technology and Management 2025 – Present

- Co-organizing a national-level hackathon (Sept 2026) as one of the event heads, driving registrations and marketing via Unstop.

EDUCATION

BMS Institute of Technology and Management, Bengaluru, India 2023 – 2027

Bachelor of Engineering in Information Science and Engineering CGPA: 9.36 / 10

Presidency PU College, Bengaluru, India 2023

Class XII (PU) 92%

ACHIEVEMENTS

- **270+ LeetCode Problems Solved**, Rating 1474 – arrays, graphs, trees, dynamic programming, and binary search.
- **1st Place, Riddlex Coding Contest**, BMSIT – college-wide competitive programming contest.
- **8th Place, IEEE Summer of Code** – national open-source contribution program.
- **3rd Place, Advert 2.0**, BMSIT E-Cell – inter-college marketing/strategy competition.
